AYUSH YADAV

Gurgaon, Haryana | +91-9306139403 | ayyadav374@gmail.com | linkedin.com/in/ayush-yadav-78b108258

PROFESSIONAL SUMMARY

Analyst with an engineering background and formal risk training (FRM Part I, GARP) who works with business data across functions to track and report metrics, analyse methodologies and recommend operational improvements. Experience building KPI dashboards and management reporting packs, supporting budget planning and variance tracking, evaluating proposals and business cases, and maintaining competitive and market knowledge to inform decisions. Builds effective cross-functional partnerships with internal teams and external stakeholders, and is fluent across the Microsoft Office suite with strong written, verbal and collaboration skills. Detail-oriented, dependable to deadlines and comfortable owning recurring deliverables end to end.

EDUCATION & CERTIFICATION

Bachelor of Technology, Computer Science & Engineering **2022 - 2026**
National Institute of Technology, Kurukshetra | CGPA: 8.2 / 10 *Kurukshetra, India*

Financial Risk Manager (FRM) - Part I, GARP **Cleared**

PROFESSIONAL EXPERIENCE

Financial Analyst - Reporting & Business Analysis | BlueStock.in **Aug 2025 - Present**
Gurugram, India

- Track and report business and performance metrics across functions; build and maintain KPI dashboards and monthly MIS packs in Excel and Power BI, and present results to management with clear commentary on drivers.
- Analyse existing methodologies and reporting processes, identify gaps and redundancies, and implement improved templates and checks that reduce manual effort and improve data accuracy and turnaround.
- Support budget planning and manage budget-versus-actual tracking; investigate variances to root cause, quantify impact and recommend corrective actions and cost-saving opportunities.
- Build evaluations of proposals and business cases - sizing the opportunity, modelling costs and returns, testing assumptions under scenarios, and presenting a clear recommendation.
- Maintain competitive and market knowledge through ongoing sector, peer and pricing research, and translate findings into briefing notes that inform commercial and operational decisions.
- Build cross-functional partnerships with finance, operations and external stakeholders; gather requirements, resolve data queries and coordinate inputs to deliver reporting on schedule.
- Produce written reports, summaries and PowerPoint decks for senior stakeholders, converting detailed analysis into concise, decision-ready communication.

Research Analyst, Associate Programme | IIM Bangalore-affiliated Programme **May 2024 - Sept 2024**
Remote

- Produced 12+ analytical reports covering market sizing, competitive benchmarking, operating metrics and performance drivers, each closing with an evidence-backed recommendation.
- Collected, cleaned and interpreted data from multiple sources and presented conclusions to programme mentors and peer review panels.
- Built and maintained structured data trackers for sector and company metrics, standardising definitions and sources so figures stayed consistent and comparable across reports.
- Reviewed and refined research methodology based on mentor feedback, and documented the approach so analyses could be repeated and checked by others.
- Worked in a cross-functional cohort setting with peers from finance, consulting and engineering backgrounds, coordinating inputs and defending analytical conclusions in group reviews.

Finance Executive | A Digital Blogger **May 2023 - Jul 2023**
Mohali, India

- Built budgets, KPI trackers and management reporting packs, and documented repeatable processes that reduced manual error and improved reporting consistency.
- Tracked and reported weekly and monthly performance metrics across revenue, cost and customer acquisition, and flagged variances against plan with commentary for management review.
- Evaluated proposed spends and vendor options on a cost-benefit basis and presented recommendations to management in Excel and PowerPoint.
- Partnered with marketing, operations and leadership to gather inputs, resolve data discrepancies and deliver recurring reporting on schedule.

VENTURES & PROJECTS

- **SME Consulting LLP - Co-founder:** deliver business reviews for SME clients covering performance metrics, cost structure, process efficiency and growth opportunities, working directly with owners and operating teams.
- **Safe Horizon - Founder:** building an advisory venture; defined the service model and pricing, built the operating budget, and designed assessment methodology and client reporting templates.
- **Reporting & Automation Projects:** built Python and SQL tools and dashboards deployed across two applications with 2,500+ combined users, including automated data validation and exception reporting.

CORE COMPETENCIES
