AYUSH YADAV

Business Systems Analysis • Data & Analytics • Fintech Product Development

Gurgaon, Haryana | +91-9306139403 | ayyadav374@gmail.com | linkedin.com/in/ayush-yadav-78b108258

PROFESSIONAL SUMMARY

Computer Science engineer working at the intersection of **business systems, analytics and finance technology**. Experienced in **requirement gathering from business stakeholders**, **translating business needs into detailed system and reporting specifications**, and delivering **SQL, Python and Power BI** solutions against them. Built and shipped **fintech applications used by 2,500+ users**, covering the full cycle from user requirements and data modelling to release and iteration. Strong in **process analysis, business process documentation, data validation and reporting automation** within a **regulated, compliance-sensitive domain (financial services)** — directly transferable to **healthcare technology**, where data accuracy, auditability and regulatory alignment carry the same weight. Comfortable acting as **liaison between business users and engineering teams**.

EDUCATION

B.Tech, Computer Science & Engineering | **National Institute of Technology, Kurukshetra** | *CGPA 8.2/10* **2022 – 2026**

TECHNICAL SKILLS

Data & Analytics: SQL (joins, aggregations, stored queries), **Python** (pandas, NumPy, scripting, workflow automation), **Advanced Excel** (lookups, pivots, sensitivity tables, macros), **data validation and reconciliation**, **exploratory and quantitative analysis**

Business Intelligence & Reporting: Power BI dashboards and visualisation, recurring **MIS and reporting packs**, KPI and metric definition, **PowerPoint** for stakeholder and client presentations

Systems & Engineering: Database Management Systems, data modelling, Data Structures & Algorithms, Operating Systems, **Machine Learning**, **Software Development Lifecycle (SDLC)**; **end-to-end application development, release and iteration**

Domain Exposure: Financial services, capital markets and fintech — regulated data, compliance-sensitive reporting and audit-ready documentation; **strong interest in healthcare technology** and payer/provider data systems

CORE COMPETENCIES

Business Systems Analysis: Requirement gathering and elicitation, **translating business requirements into detailed system specifications**, **current-state and future-state process analysis**, scope and **acceptance criteria definition**, gap analysis

Documentation & Process Improvement: Business process documentation, workflow mapping, standardised templates and **reusable frameworks**, **process improvement and automation of manual workflows**, knowledge transfer and handover material

Stakeholder & Client Management: Liaison between business users and engineering/technical teams, presenting findings to **non-technical audiences**, **client-facing communication**, responding to user queries, written and verbal communication

Delivery & Project Support: Managing multiple concurrent workstreams under deadlines, **scope and timeline coordination**, quality and accuracy of deliverables, **iterative improvement based on user feedback**

PROFESSIONAL EXPERIENCE

Financial Analyst, Investment Banking Division | **BlueStock.in, Gurugram** **Aug 2025 – Present**

- Partner with **business stakeholders** to elicit requirements, **translate business needs into defined data and reporting specifications**, agree scope and acceptance criteria, and deliver output in a format they can act on.
- **Automate recurring workflows in Python, SQL and Excel** — data extraction, transformation, computation and benchmarking — driving **process improvement** by replacing manual steps with standardised, repeatable ones and **reducing turnaround time**.
- **Build and maintain Power BI dashboards and MIS reporting packs** for periodic tracking, **defining KPIs, metric logic and refresh cycles** with the business users who consume them.
- **Maintain and validate reference and reporting databases**, running **data quality, accuracy and completeness checks** so that downstream analytics and reporting stay reliable and auditable.
- **Document processes, methodology and system logic**, and build **reusable templates and frameworks** so outputs stay consistent across the team and are easy to support, maintain and hand over.

Research Intern | **IIM Bangalore Associate Programme (Remote)** **May 2024 – Sept 2024**

- Delivered **12+ structured analytical reports** to a defined format and deadline, each requiring source data collection, validation and synthesis into a written recommendation.
- Worked across **multiple concurrent workstreams** remotely, coordinating with reviewers and incorporating feedback through successive iterations.

Finance Executive | **A Digital Blogger, Mohali** **May 2023 – Jul 2023**

- **Reconciled records and validated client data** for accuracy and completeness, flagging discrepancies for resolution before reporting cycles closed.
- Compiled **periodic MIS and management reporting packs**, consolidating data from multiple sources into a single reviewed format.
- **Built standardised Excel reporting templates adopted by the team**, cutting manual error and rework on recurring reports.

PROJECTS

FinSight & SharePicker — Fintech Applications (Python): Designed, built and shipped two **end-to-end fintech products — defining user requirements**, **structuring the data model**, building the application logic, releasing and **iterating on live user feedback**. **2,500+ combined users**, **4.5 user rating**. Full **business-analyst-to-developer** ownership in a single role.

Structured Analysis Framework (self-developed): Designed and documented a **seven-stage analytical framework** that standardises an end-to-end evaluation process, enabling **consistent, repeatable application across users** — an example of turning an ad-hoc process into a defined, documented one.

CERTIFICATIONS

FRM Part I cleared (GARP), Part II candidate | **FMVA, CFI** | **Bloomberg Market Concepts** | **J.P. Morgan Virtual Experience (Forage)** | NISM Series XV (preparation completed). Languages: English, Hindi. Based in Gurgaon; comfortable with on-site work in Noida — **immediate joiner**.
