AYUSH YADAV

Credit Policy | Portfolio Strategy | Risk Analytics

Gurugram, Haryana, India • +91-9306139403 • ayyadav374@gmail.com • linkedin.com/in/ayush-yadav-78b108258

PROFESSIONAL SUMMARY

Credit strategy and portfolio analytics professional with experience in unsecured retail and digital lending. Competent in credit policy formulation, customer eligibility criteria, limit and exposure frameworks, scorecard-driven underwriting and ownership of portfolio profit and loss key performance indicators. Applies SQL, Python, PySpark SQL and machine learning to underwriting, delinquency and collections decisions, partnering with product, data science and business operations teams to improve uptake, repayment and portfolio revenue.

EDUCATION

B.Tech, Computer Science and Engineering — National Institute of Technology (NIT), Kurukshetra | 2022 – 2026 | CGPA 8.2/10

Financial Risk Manager (FRM), Part I — Global Association of Risk Professionals (GARP) | Cleared

PROFESSIONAL EXPERIENCE

BlueStock.in, Gurugram, India **August 2025 – Present**

Analyst, Credit Strategy and Portfolio Analytics — Investment Banking Division

- Developed credit assessment and customer eligibility frameworks for unsecured retail and small-business lending portfolios, establishing cut-off logic, exposure limits and risk-based pricing across the customer loan life cycle.
- Extracted and modelled borrower-level data using SQL and Python to segment portfolios by risk band, construct vintage and roll-rate views and quantify delinquency migration across days-past-due buckets.
- Designed portfolio tracking metrics and reporting dashboards covering approval rate, utilisation, 30-plus and 90-plus days-past-due, non-performing assets, yield and collection efficiency, enabling closed-loop monthly governance review.
- Analysed portfolio profit and loss drivers, including interest income, credit cost, expected credit loss provisioning and recovery rates, and ran scenario and stress analysis to assess proposed policy changes before implementation.
- Partnered with product and business teams on test-and-learn pilots, including champion–challenger offer constructs, limit enhancement rules and customer communication journeys, measuring uplift in uptake, usage and repayment behaviour.

IIM Bangalore Associate Programme (Remote) **May 2024 – September 2024**

Research Analyst, Credit and Portfolio Research

- Authored more than twelve institutional research reports across banking, non-banking finance and digital lending, examining credit growth, asset quality, provisioning cycles and collection efficiency.
- Benchmarked lending portfolios against peers on yield, cost of funds, credit cost and delinquency to isolate the structural drivers of portfolio performance and risk-adjusted returns.
- Constructed forecasting models in Python and Excel for loan book growth and credit losses, improving forecast accuracy by approximately eighteen per cent against the prior baseline.

A Digital Blogger, Mohali, India **May 2023 – July 2023**

Finance Executive, Portfolio Reporting and Revenue Analytics

- Established key performance indicator trackers and automated management reporting on revenue streams, acquisition cost and funnel performance for senior management review.
- Undertook budgeting, cash-flow forecasting and peer benchmarking, informing budget reallocation decisions.

SELECTED PROJECTS AND VENTURES

Risk Scoring and Screening Engine (SharePicker): Multi-factor scoring engine in Python and SQL that ranks and screens instruments on weighted risk and quality parameters, with automated data pipelines and rule-based filters; adopted by over 500 users.

FinSight, Portfolio Risk Analytics Application: Application computing exposure concentration, volatility, drawdown and value at risk with scenario testing; over 2,000 downloads at a 4.5 out of 5 rating.

Value at Risk and Loss Distribution Modelling: Historical, parametric and Monte Carlo value-at-risk with back-testing in Python to estimate tail loss and inform exposure limits.

Founder, Safe Horizon (Risk Advisory); Co-Founder, SME Consulting LLP: Advisory ventures delivering credit, operational and compliance risk frameworks and growth strategy to small and medium enterprises and lending businesses.

AREAS OF EXPERTISE AND TECHNICAL PROFICIENCIES

Credit Risk and Policy: Credit policy formulation; underwriting strategy; application and behavioural scorecards; customer eligibility rules; limit setting and exposure management; risk-based pricing; unsecured retail and digital lending.

Portfolio Management: Portfolio profit and loss ownership; vintage, roll-rate and bucket-flow analysis; days-past-due delinquency monitoring; loss forecasting; probability of default, loss given default and expected credit loss; portfolio governance.

Growth and Collections: Customer life cycle management; segmentation and targeting; test-and-learn and champion–challenger design; collections strategy and agency coordination; direct debit optimisation; SMS, USSD and mobile app journeys.

Data and Programming: SQL (advanced); Python (pandas, NumPy, scikit-learn, statsmodels); PySpark SQL; big data environments (Hadoop and Spark stack); advanced Microsoft Excel and VBA.

Machine Learning and Statistics: Logistic regression; decision trees; random forest; gradient boosting (XGBoost); K-means clustering; weight of evidence and information value; Kolmogorov–Smirnov and Gini; scenario and Monte Carlo analysis.

Reporting and Tools: Power BI; Tableau; MIS automation; financial modelling and valuation; Bloomberg Terminal; Jupyter; Git.

PROFESSIONAL CERTIFICATIONS

Financial Modeling and Valuation Analyst, FMVA (CFI) • Bloomberg Market Concepts • NISM Series XV, Research Analyst • J.P. Morgan Investment Banking Virtual Experience (Forage).
