AYUSH YADAV

Equity Derivatives Valuation | Product Control | P&L Attribution | Quantitative Risk

Gurugram, Haryana | +91-9306139403 | ayyadav374@gmail.com | linkedin.com/in/ayush-yadav-78b108258

PROFILE

Computer Science engineer (NIT Kurukshetra) and FRM Part I qualified analyst combining quantitative training, Python engineering and hands-on financial modelling from live investment banking deal work. Grounded in derivative pricing (Black-Scholes, binomial and simulation methods), option Greeks and market-risk measurement. Brings a control-first mindset - accurate marks, explainable P&L, reconciled numbers and clean documentation - and the coding ability to automate pricing checks, lifecycle monitoring and large-dataset analytics for structured products desks.

KEY HIGHLIGHTS

- **FRM Part I cleared** (GARP, May 2026) - strong grounding in valuation & risk models, derivative pricing, Greeks and market-risk measurement.
- **Engineer-turned-finance analyst:** B.Tech CSE (NIT Kurukshetra, CGPA 8.2) with production coding experience - two live fintech products with 2,500+ combined users.
- **Live deal exposure** in an Investment Banking Division - financial modelling, valuation and reconciliation under tight timelines.
- **12+ institutional-style research reports** through the IIM Bangalore Associate Programme.

CORE COMPETENCIES

Derivatives & Valuation: Option pricing (Black-Scholes, binomial trees, Monte Carlo), Greeks (Delta, Gamma, Vega, Theta, Rho), volatility surfaces, fair value & independent price verification concepts, DCF / relative valuation

Structured Products: Autocallables, barrier and knock-in put features, worst-of baskets, reverse convertibles - payoff mechanics and lifecycle events (coupons, autocall observations, barrier breaches)

Market Data & Calibration: Implied volatility surfaces and skew, correlation, dividend and rates inputs; parameter calibration and sensitivity testing

Risk & P&L: Greeks-based P&L explain, VaR / Expected Shortfall, stress testing, model risk, reconciliation and variance investigation

Technology: Python (pandas, NumPy - data pipelines, automation, analytics), Java, Advanced Excel & financial modelling, large-dataset handling

Controls: Process documentation, exception tracking, lifecycle and event monitoring, cross-team partnership with deal, risk and operations teams

PROFESSIONAL EXPERIENCE

BlueStock.in - Investment Banking Division — Aug 2025 - Present

Financial Analyst — *Gurugram*

- Build and maintain **financial models and valuation workings** supporting live deal execution; ensure assumptions tie back to source market and company data before numbers go to senior bankers.
- Run **reconciliation and sanity checks** across model outputs, investigating variances and documenting the drivers - the same discipline required for daily marks and P&L sign-off.
- Use **Python-based automation** to speed up data collection, cleaning and repetitive analytics, improving turnaround and reducing manual errors.
- Prepare **peer comparables, sensitivity and scenario tables** to show how valuation outcomes move with key inputs - analogous to Greeks-based sensitivity analysis.
- Maintain clear **model documentation and version control**, so every number can be traced, reviewed and audited.
- Work across deal, research and client teams to translate complex numbers into clear explanations for decision-makers.

IIM Bangalore - Associate Programme — Mar 2024 - Sep 2024

Finance Research Intern — *Bengaluru*

- Authored **12+ institutional-style equity research reports** covering business analysis, financial statement analysis, forecasting and valuation.
- Performed sector and peer benchmarking (P/E, EV/EBITDA, return ratios) and stress-tested valuation assumptions through sensitivity analysis.
- Built three-statement forecasts and **DCF / relative valuation models**, presenting investment theses with clear risk factors.
- Tracked management commentary, concall disclosures and filings to validate business assumptions against reported numbers.

A Digital Blogger — May 2023 - Jul 2023

Finance Executive — *Mohali*

- Supported financial analysis, reporting and market-research content; maintained accuracy and consistency of published financial data.
- Researched market trends and financial products, converting technical topics into clear, accurate content for a retail audience.

PROJECTS & PRODUCTS

SharePicker - Stock Screening Application | 500+ users

- Designed and built a multi-factor equity screener handling large market datasets; engineered data pipelines, filters and ratio computation logic.

FinSight - Personal Finance Application | 2,000+ downloads, 4.5 rating

- Built and shipped an end-to-end personal finance app; owned architecture, data handling, testing and release.

LEADERSHIP & ENTREPRENEURSHIP

- **Safe Horizon** - Founder, building a risk advisory venture with the long-term aim of becoming a trusted independent risk advisory firm in India.
- **SME Consulting LLP** - Co-founder; setting up a consulting practice for small and mid-sized businesses covering financial analysis, risk and growth advisory.

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science & Engineering - NIT Kurukshetra — **2022 - 2026**

CGPA 8.2 / 10 | Coursework: Probability & Statistics, Linear Algebra, Numerical Methods, Data Structures & Algorithms

- **FRM (GARP)** - Part I cleared (May 2026); Part II candidate. Coverage: valuation & risk models, derivatives, market risk, quantitative analysis
- **FMVA** (Financial Modeling & Valuation Analyst) | **Bloomberg Market Concepts** | **J.P. Morgan** Forage virtual programme
- **The Valuation School** - Equity Research Cohort (financial modelling, valuation, report writing)
- **NISM Series XV** - Research Analyst certification preparation
