Gurugram, Haryana, India • +91-9306139403 • ayyadav374@gmail.com • linkedin.com/in/ayush-yadav-78b108258

PROFESSIONAL SUMMARY

Finance professional with experience in financial planning and analysis, budgeting and forecasting, revenue reporting and reconciliation, and variance analysis. Competent in building Excel-based models and PowerPoint reporting packs for senior management, reviewing spend and cost trends, and partnering with accounting and cross-functional teams to resolve data quality issues and ensure clean financials. Financial Modeling and Valuation Analyst (FMVA) certified, with advanced Excel, Power BI and PowerPoint capability and a track record of automating recurring management reporting.

EDUCATION

B.Tech, Computer Science and Engineering — National Institute of Technology (NIT), Kurukshetra | 2022 – 2026
Financial Risk Manager (FRM), Part I — Global Association of Risk Professionals (GARP) | Cleared

PROFESSIONAL EXPERIENCE

BlueStock.in, Gurugram, India **August 2025 – Present**
Financial Analyst — Planning, Reporting and Analysis

- Prepare monthly and quarterly financial reporting packs in Excel and PowerPoint for senior management, covering revenue performance, cost trends, margin movement and key business drivers.
- Build and maintain budgeting and forecasting models, performing budget-versus-actual variance analysis and explaining drivers of deviation to business stakeholders.
- Conduct revenue and customer-level analysis, including reconciliation of billing and collection data against reported revenue, flagging anomalies for accounting review.
- Review key spend areas such as vendor cost, headcount-related cost and operating expense trends to identify risks, savings opportunities and over-run exposure on a timely basis.
- Coordinate with accounting and cross-functional finance teams to investigate data quality issues, review supporting entries and ensure reporting consistency across systems.
- Automated recurring management information reporting using Excel, Power Query and Power BI, materially reducing manual preparation effort and version-control errors.
- Support ad-hoc analysis requests from senior stakeholders under tight deadlines, preparing and format-checking presentation materials to ensure decks always carry the latest validated data.

IIM Bangalore Associate Programme (Remote) **May 2024 – September 2024**
Finance Research Analyst — Forecasting and Variance Analysis

- Built driver-based revenue and cost forecasting models in Excel and Python, improving forecast accuracy by approximately eighteen per cent against the prior baseline.
- Authored more than twelve analytical reports with peer benchmarking on revenue growth, margin structure and cost ratios, presented through structured PowerPoint decks.
- Performed variance analysis on quarterly results against estimates and documented the underlying drivers for review.

A Digital Blogger, Mohali, India **May 2023 – July 2023**
Finance Executive — Budgeting, Reporting and Reconciliation

- Prepared annual budgets, rolling cash-flow forecasts and weekly key performance indicator reporting on revenue streams and acquisition cost for management review.
- Reconciled revenue and expense records against accounting data, resolving discrepancies with the accounts team and standardising reporting formats.
- Benchmarked spend against peers and presented findings to leadership, supporting budget reallocation across marketing and operating cost lines.

SELECTED PROJECTS

Automated Management Reporting Dashboard: Built an Excel and Power BI reporting pack with automated data refresh, standardised slide formatting and version checks, eliminating manual re-keying across recurring monthly reporting.

FinSight, Financial Analytics Application: Application computing performance, concentration and volatility metrics with scenario testing; over 2,000 downloads at a 4.5 out of 5 rating.

SharePicker, Screening and Analytics Tool: Built a Python and SQL engine that ranks and screens companies on weighted financial and quality parameters with automated data pipelines; adopted by over 500 users.

Founder, Safe Horizon; Co-Founder, SME Consulting LLP: Advisory ventures delivering financial planning, budgeting and MIS reporting support to small and medium enterprises.

CORE COMPETENCIES AND TECHNICAL SKILLS

FP&A: Annual budgeting; rolling forecasts; budget-versus-actual variance analysis; revenue reporting and reconciliation; customer and product profitability analysis; cost and vendor spend review; compensation and headcount cost trends; month-end reporting support.

Accounting and Controls: Financial and general accounting principles; journal entry review; accruals and provisions; data quality resolution; reporting governance and version control.

Tools: Advanced Microsoft Excel (pivot tables, lookups, Power Query, modelling); Microsoft PowerPoint (executive decks, formatting standardisation); Power BI; Tableau; SQL; Python; Bloomberg Terminal; exposure to ERP and planning systems.

Behavioural: Clear and concise communication; stakeholder partnering across finance and business teams; prioritisation of multiple deliverables under tight deadlines; process improvement orientation.
