AYUSH YADAV

Gurgaon, Haryana | +91-9306139403 | ayyadav374@gmail.com | linkedin.com/in/ayush-yadav-78b108258

PROFESSIONAL SUMMARY

Research and analytics professional with FRM Part I (GARP) cleared, combining equity research experience with client analytics, management information reporting and dashboard development. Experienced in maintaining and improving client and commercial datasets, validating data at capture, producing regular and ad hoc MI for senior stakeholders, and preparing analysis that supports pricing and commercial discussions. Sound understanding of capital markets and the equity research business, including how research is consumed, valued and paid for under MiFID-related arrangements. Advanced Excel and PowerPoint user with Python, SQL and Power BI applied to reporting automation.

EDUCATION

Bachelor of Technology, Computer Science & Engineering **2022 - 2026**
National Institute of Technology, Kurukshetra | CGPA: 8.2 / 10 *Kurukshetra, India*

Financial Risk Manager (FRM) - Part I, GARP **Cleared**

PROFESSIONAL EXPERIENCE

Financial Analyst - Research & Client Analytics | BlueStock.in **Aug 2025 - Present**
Gurugram, India

- Produce regular and ad hoc management information reports, dashboards and analysis for senior stakeholders, covering client activity, revenue and performance metrics.
- Maintain and improve client-related datasets - pricing records, client interactions, usage and engagement metrics - including validation at the point of capture and periodic data-quality review.
- Collect, validate, track and report recurring submission-based data from multiple internal and external sources, reconciling inconsistencies before figures are released.
- Prepare analysis supporting pricing discussions and commercial conversations - client-level consumption and value analysis, benchmarking and scenario comparisons - delivered ahead of meetings.
- Build and enhance in-house dashboards and reporting tools in Excel, Power BI, SQL and Python, automating recurring reporting and reducing manual preparation time.
- Work closely with onshore and cross-functional stakeholders to gather requirements, resolve data queries and deliver reporting against business priorities and deadlines.
- Contribute to process-improvement workstreams - strengthening controls in the reporting framework, documenting procedures and replacing manual steps with automated routines and standard templates.

Research Analyst, Associate Programme | IIM Bangalore-affiliated Programme **May 2024 - Sept 2024**
Remote

- Authored 12+ equity and sector research reports covering market sizing, competitive landscape, financial performance and valuation, every one delivered within deadline.
- Built valuation and forecasting models from primary filings and disclosures, and benchmarked peers on growth, margin and capital-efficiency metrics.
- Revised every report through mentor and peer-panel review, strengthening structure, evidence and clarity with each round - direct exposure to how research output is quality-controlled before publication.
- Maintained structured trackers of company and sector metrics across coverage, standardising definitions and sources so figures stayed comparable across reports.

Finance Executive | A Digital Blogger **May 2023 - Jul 2023**
Mohali, India

- Built the first structured KPI tracker and monthly management reporting pack, replacing ad-hoc reporting with a consistent format.
- Compiled and verified data from multiple sources, documented repeatable processes and checks, and presented analysis to management in Excel and PowerPoint.
- Tracked weekly and monthly performance metrics across revenue, cost and customer acquisition, and flagged variances against plan with written commentary for leadership.

VENTURES & PROJECTS

- **SharePicker & FinSight - Fintech Products:** shipped two applications reaching 2,500+ combined users (FinSight: 2,000+ downloads, 4.5 rating); owned the data pipeline and the usage, activation and retention metrics after launch.
- **Reporting Automation (Python, SQL, Excel/VBA):** built tools that aggregate data from multiple sources with automated validation and exception flags, replacing manual report preparation.
- **Safe Horizon - Founder:** built the service model, pricing structure and operating budget from zero, and designed the assessment methodology and client reporting templates.

CORE COMPETENCIES
