AYUSH YADAV

Risk Management | Investment & Portfolio Risk | FRM Part I Passed | FMVA
Gurugram, Haryana | +91-9306139403 | ayyadav374@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Risk management professional with FRM Part I passed (GARP) and a Computer Science engineering degree from NIT Kurukshetra. Performs risk assessment on 6+ live investment banking mandates at BlueStock.in, identifying, measuring and reporting credit, liquidity and valuation risk. Applies Python-based quantitative risk analysis (VaR, stress testing, scenario analysis), supported by 12+ institutional research reports.

EDUCATION

B.Tech, Computer Science & Engineering 2022 – 2026
National Institute of Technology (NIT), Kurukshetra

Financial Risk Manager (FRM) Part I, GARP Cleared – May 2026
Part II in preparation

PROFESSIONAL EXPERIENCE

Financial Analyst – Investment Banking Division Aug 2025 – Present
BlueStock.in *Gurugram, Haryana*

- Identify, assess and report credit and liquidity risk on 6+ live mandates through leverage, interest coverage, liquidity and cash-flow analysis.
- Stress-test deal assumptions under base, upside and downside cases with ±10–20% shocks to revenue, margin and cost-of-capital drivers.
- Build 10+ risk-adjusted financial models, including 5-year DCF and comparable-company valuations using 8–12 listed peers.
- Prepare risk memos, research notes and decks stating key assumptions, risks and mitigants for senior stakeholders.
- Benchmark companies against peers across 20+ ratios and reconcile gaps in client data before models reach senior bankers.

Finance Research Intern Mar 2024 – Sep 2024
IIM Bangalore (Associate Programme) *Bengaluru, Karnataka*

- Authored 12+ institutional-style equity research reports across 6+ sectors, each with a dedicated key-risks section.
- Tracked early-warning signals (margin compression, receivable build-up, promoter pledging, OCF vs. PAT gap) using 5-year financial data.
- Built Excel templates for ratio trends and peer comparison used across all reports.

Finance Executive May 2023 – Jul 2023
A Digital Blogger *Mohali, Punjab*

- Performed monthly P&L variance analysis across 10+ cost and revenue heads and tracked receivables to flag collection delays early.
- Maintained weekly receivables and cash-flow tracker in Excel to support finance reporting.

PROJECTS

Portfolio Risk Analysis – VaR & Stress Testing *Python, Excel*

- Built a 10-stock portfolio on 3 years of daily data; measured volatility, beta, historical and parametric VaR at 95%/99% and maximum drawdown; stress-tested under 4 scenarios (e.g., 2020 crash, rate shock).

Company Research & Valuation Framework *Excel*

- Designed a seven-step framework (business, sector, financials, management, valuation, risk, thesis) used for 12+ company reports.
- Built DCF and peer-based valuations (P/E, EV/EBITDA, P/B) with sensitivity tables to arrive at a fair value range.

SharePicker & FinSight – Fintech Applications *Python, Java*

- Built a stock screener with valuation, growth and leverage filters, and a personal finance app for budgeting and savings (4.5 rating on Maven Central).

CERTIFICATIONS

- FMVA – Financial Modeling & Valuation Analyst, Corporate Finance Institute
- Bloomberg Market Concepts (BMC) | J.P. Morgan Investment Banking Virtual Experience (Forage)
- NISM Series XV: Research Analyst – preparation completed
