Strategy & Execution | Business Operations | Process Improvement | Lending & Mortgage Analytics

Gurugram, Haryana | +91-9306139403 | ayyadav374@gmail.com | linkedin.com/in/ayush-yadav-78b108258

PROFESSIONAL SUMMARY

Analyst with 1+ year of hands-on business execution experience across investment banking, research and finance operations, currently a Financial Analyst at BlueStock.in. Plans and delivers multiple live client mandates end to end: breaking work into milestones, tracking deliverables and KPIs, reconciling data and presenting outcomes to senior stakeholders. Strong grounding in lending, credit and mortgage-related risk through FRM Part I (GARP), plus an engineering mindset from NIT Kurukshetra for spotting process gaps, standardising workflows and building Excel/PowerPoint reporting that saves time.

EDUCATION

B.Tech, Computer Science & Engineering 2022 – 2026
National Institute of Technology (NIT), Kurukshetra *Kurukshetra, Haryana*

Financial Risk Manager (FRM) – Part I, GARP **Cleared – May 2026**
Part II in preparation

PROFESSIONAL EXPERIENCE

Financial Analyst – Investment Banking Division Aug 2025 – Present
BlueStock.in *Gurugram, Haryana*

- Plan and execute deliverables on 6+ live client mandates with deal leads: define scope and timelines, break work into milestones and track progress to on-time delivery.
- Monitor key financial and operating indicators (revenue growth, margins, leverage, interest coverage, cash flow) for client companies and flag deviations to senior team members.
- Identify gaps and inconsistencies in client-provided data, coordinate with client management and internal teams to resolve them, and reconcile into clean, reliable datasets.
- Standardised reusable Excel model and memo templates across mandates, cutting repetitive rework and improving consistency of outputs across the team.
- Build 10+ Excel models with base, upside and downside scenarios, and convert analysis into PowerPoint decks and summary memos for senior stakeholders.
- Prepare 15+ memos and status updates summarising progress, open issues, risks and next steps, keeping deal leads and client teams aligned on priorities.
- Benchmark client companies against 8–12 listed peers across 20+ ratios to highlight efficiency gaps and cost-saving opportunities in their operations.
- Review client business processes and policies during diligence, map as-is workflows and document control gaps and improvement recommendations.

Finance Research Intern Mar 2024 – Sep 2024
IIM Bangalore (Associate Programme) *Bengaluru, Karnataka*

- Delivered 12+ structured research reports across 6+ sectors, including banking and financial services, following a fixed seven-step review framework and deadline schedule.
- Benchmarked companies against peers on growth, margins, leverage and asset quality, and tracked early-warning indicators such as receivable build-up and OCF vs. PAT gaps.
- Studied lending businesses (banks, NBFCs, housing finance companies) on disbursement growth, NIM, GNPA/NNPA and collection efficiency to assess operating performance.
- Presented findings to programme mentors in concise decks and incorporated feedback into later reports, improving turnaround on each cycle.

Finance Executive May 2023 – Jul 2023
A Digital Blogger *Mohali, Punjab*

- Ran monthly P&L variance analysis across 10+ cost and revenue heads and highlighted cost overruns and savings opportunities to management.
- Maintained Excel-based MIS reports and tracked receivables and cash flows weekly to flag collection delays early.
- Reviewed vendor and operating expenses to identify recurring cost leakages and supported budget planning for the next quarter.

PROJECTS

Lending & Mortgage Portfolio Review Framework Excel

- Designed a KPI tracker for a loan book covering disbursement volumes, turnaround time, delinquency buckets (DPD 30/60/90+), LTV and prepayment trends, with a monthly management summary.
- Mapped the mortgage lifecycle (application, underwriting, approval, disbursement, servicing, collections) and identified process bottlenecks and control checkpoints at each stage.

SharePicker – Stock Screening Application Python

- Defined requirements, filter logic and data model for a fundamentals-based screener; prioritised enhancements based on user feedback.

FinSight – Personal Finance Application Java

- Scoped budgeting and analytics features from user needs and launched the app on Maven Central (4.5 rating).

CERTIFICATIONS

- FMVA – Financial Modeling & Valuation Analyst, Corporate Finance Institute
- Bloomberg Market Concepts (BMC) | J.P. Morgan IB Virtual Experience (Forage) | NISM Series XV (Research Analyst) – prep completed
